

Adobe Research Fellowship

Win \$10,000 toward tuition, 1-year subscription to Adobe Creative Cloud, and an opportunity to interview for an internship.

Here at Adobe Research we create innovative technologies for our software products to better serve consumers, creative professionals, developers, and enterprises. We bring together the smartest, most driven people we can find, and we allow them the freedom to nurture their intellectual curiosity, while providing them with the necessary resources, support and freedom to shape their ideas into tangible results.

Collaboration with the academic community plays a fundamental role in this process. Our research model blends our goal for business impact and our desire to collaborate with researchers outside of Adobe. Our lab maintains collaborations with well over fifty university partners, both students and faculty. Each researcher hosts several interns a year, giving them the opportunity to build the next generation of tools to support creatives. Our work is published in peer-reviewed conferences and journals, ensuring that the impact of our research goes well beyond Adobe and into the research community at large.

As a next natural step in supporting this ongoing relationship we are pleased to invite applications to the Adobe Research Fellowship. The Adobe Research Fellowship recognizes outstanding graduate students anywhere in the world carrying out exceptional research in areas of computer science important to Adobe.

Application Timeline

- Friday, July 30th - September 8th, 2021
